

PRODUCT NAME

Chain oil (all grades)

TECHNICAL DATA

INTRODUCTION

H-Go Chain oil have been developed for jobs requiring a tough lubricant that does not drip. H-Go chain oil adheres strongly to moving parts and protects them against wear, even in harsh conditions. Their red color helps determine if the chain is properly lubricated. Available in three different viscosities: light, medium and heavy.

APPLICATIONS

H-Go Chain oil should be used to any general lubrication that requires an oil that does not drip or that could be exposed to water contamination. Ideally for the lubrication of chains and saw guides.

ADVANTAGES

- Strongly adheres to the chain.
- Protects against wear and rust.
- Colored red to easily see the lubricant on the chain.
- Offered in three grades to provide lubrication through all weather conditions.

H-GO Chain oil TYPICAL PROPERTIES

SPECIFICATIONS	Light (winter)	Medium (spring – autumn)	Heavy (summer)
Specific Gravity (15.6 °C)	0.87	0.87	0.88
Viscosity (cSt, 40 °C)	38 – 68	63 – 85	95 - 105
Flash Point (°C)	> 200	> 200	> 200
Pour point (°C)	-38	-38	-20
